Bioscience PhD Programs
THE UNIVERSITY OF UTAH

Molecular Biology:
Biochemistry/Structural Biology
Cancer/Cell Biology
Developmental Biology
Gene Expression
Genetics
Microbiology/Immunology

Biological Chemistry:
Biochemistry
Chemical Biology/Medicinal Chemistry
Structural Biology/Biophysics

For More Information:

The Bioscience PhD Programs include the Molecular Biology and Biological Chemistry programs. Each program is distinct in its core curriculum and requirements, but share many of the same benefits, including:

- Competitive Stipend
- Starting Allocation
- Tuition Waiver
- Health Insurance
- Outstanding Core Facilities
- Collaborative Environment

The programs allow students to experience a broad scientific education, yet tailor their training to their specific interests. Students will participate in cutting-edge research mentored by world-class scientists. In addition, the programs provide the thorough training necessary to become a creative and analytical thinker essential of a successful career in science!

Application Deadline: December 1
