Definition of Burglary:

The criminal offense of breaking and entering a building illegally for the purpose of committing a crime.

No physical breaking and entering is required; the offender may simply trespass through an open door. Unlike robbery, which involves use of force or fear to obtain another person's property, there is usually no victim present during a burglary.

Examples of Burglary:

Suspect enters student’s residence through an unlocked door with the intent to steal a laptop computer.

Suspect enters staff member’s office with the intent to steal a purse or wallet. Before finding what he is looking for, the staff member returns and he flees empty handed. Even though nothing was taken, the suspect has committed burglary.
