*Green shaded rows represent apartment complexes, where fire drills are not performed, due to individual apartments being alarmed separately.

**Blue shaded areas represent dorms that were not built at the time of the drills.

To obtain a copy of the Daily Fire Log, contact the Office of Risk Management and Compliance at (615)460-6023 or riskmanagement@belmont.edu.

For information on residence halls on campus, go to Residence Hall Building Information. [http://www.belmont.edu/reslife/residential_communities](http://www.belmont.edu/reslife/residential_communities)
Per federal law, Belmont University is required to annually disclose statistical data on all fires that occur in on-campus student housing facilities. Listed below are the non-emergency numbers to call to report fires that have already been extinguished in on-campus student housing. These are fires for which you are unsure whether Belmont Campus Security may already be aware. If you find evidence of such a fire or if you hear about such a fire, please contact one of the following:

Belmont University Campus Security (615) 460-6617
Belmont University Residence Life (615) 460-5802
When calling, please provide as much information as possible about the location, date, time and cause of the fire.

Housing Facility Fire Safety Policies and Information

Electrical Appliances and Safety

In order to insure maximum health and safety standards in residential areas, several categories of electrical appliances have been established. Those categories are as follows:

- **Prohibited Appliances** (which may NOT be used or stored in residence halls) including but not limited to: coffee makers, toasters, toaster ovens, convection ovens, electric skillets, waffle or crepe pans, crock pots, hot plates, hamburger makers, space heaters, electric blankets.
- **Kitchen-only Appliances** (which may be stored in rooms, but ONLY USED in kitchen facilities): oil popcorn poppers and George Foreman grills.
- **Room Appliances** (which may be used and stored in student rooms): musical instruments, hair dryers, fans, blenders, hot-air popcorn poppers, irons and single cup coffee makers without an open heating surface.
- **Lighting Regulations and Safety**: The University does not permit the use of halogen lamps or any other light that produces excessive heat in the student residential areas. Overhead, or room, lights may not be covered with any material. Though neon lights are permitted within residential areas, they may not be placed in windows or be seen from the exterior of the building. LED and CFL lightbulbs are encouraged when possible.
- **Refrigerators** that meet university standards (4.0 c.ft.) and are Energy Star rated are permitted.
- **Microwaves** (between 700-800 watts) are allowed in residential areas.
- **The university reserves the right to remove and/or confiscate any appliance or device it deems unsafe or problematic to a facility’s electrical system. All confiscated items will be held by the Residence Director until arrangements are made to return the item to the student, at which time it must be permanently removed from campus, such as a university break or holiday.**

Electrical Extensions

In accordance with the direction of the fire marshal, the use or possession of 2-prong extension cords, multiple plugs, or multiple plug converters is prohibited within all of the residential areas. The fire marshal has approved the use of Underwriter’s Laboratories (UL) approved power strips with circuit breakers. In addition, 3-prong extension cords not longer than 12 feet in length are also permitted. Longer extension cords may be stored in residential rooms (e.g., as needed for musical equipment), but may not be in use. Please contact your Resident Assistant (RA) if you are unsure if your power strip or extension cord is permissible.

Smoking

Smoking is not allowed anywhere on Belmont’s campus.
Belmont University
Annual Fire Safety Report 2019

Emergency Procedures

Belmont University is committed to equipping you with tools to aid in your safety in the event of an on-campus emergency. Below is a list of common emergency procedures; however, a detailed list of emergencies and procedures is available on My Belmont (in Campus Security & Safety), titled Campus Emergency Plan. Please familiarize yourself with all emergency procedures.

Earthquake

Should an earthquake occur, you should get under a piece of sturdy furniture or in a doorway. Stay away from windows and glass. Remain in building, if building is stable, unless notified by university official to vacate building to the designated area. Persons outside when an earthquake occurs should move to an open area away from electrical wires, tall structures, etc.

Fire Evacuation

Every time a fire alarm is activated, all residents must exit the building unless they have been notified prior to the event that it is not necessary to evacuate (as in testing of the alarms, etc.)

• If there is a fire or activated alarm in the building:
  1. Evacuate the building using the stairs (NEVER use the elevator)
  2. If the smoke is thick, crawl close to the floor to avoid smoke inhalation.
  3. Make your way to the designated exterior gathering area and then alert emergency response personnel
  4. (if alarm has not been activated) Call Campus Security at (615) 460-6911.
  5. If reporting the emergency, state your name, building, location of fire (wing, floor, room, etc.) and nature of the fire (laundry, equipment, mattress, etc.) If possible, stay on the line for questions, if it is safe to do so. Campus Security will contact the Nashville Fire Department.

Designated exterior gathering areas during a fire:

<td>Bruin Creek Lawn</td>
</tr>
</tbody>
</table>
If you are trapped in a building during a fire:

1. If you cannot get out of the building, go to the refuge area in the stairwell.
2. If there is a fire in the hallway, stay in your room, close the doors, dial Campus Security at (615)460-6911 and stand close to the window to signal for help.
3. Put something in the window to alert emergency responders to your location.
4. If smoke is entering the window to alert emergency responders in the cracks in the door, stuff wet clothes in the cracks.
5. Stay close to the floor to avoid smoke inhalation, but continue to shout and peek out through the window to alert emergency responders.

Fire Drills

Fire drills are conducted at least twice per year for all residence halls. Apartment complexes do not have fire drills at this time.

Fire Safety Education

Floor meetings in Residence Halls review emergency evacuation procedures, safety policy review, and Health and Safety Inspections.

RAs and RDs attend training sessions regularly on emergency procedures, including fire safety and response.

Residence Hall Fire Safety Information

The following link contains additional information about the Residence Hall’s Fire Safety Measures or contact the Office of Risk Management and Compliance at (615) 460-6023 or riskmanagement@belmont.edu. https://my.belmont.edu/group/residence-life/
MADDOX HALL

Building Name: Maddox Hall
Address: 1900 Belmont Blvd.
Year Built: 1985
Occupancy: Residence Hall
Capacity: 152
Construction Type: Reinforced concrete slab, CMU walls, flat roof concrete slab.

Fire Alarm And System Description

Fire Alarm Panel: SimplexGrinnell

General Description: Fire alarm system consists of manual pull stations, visual/audible alarm devices and integrated automatic detection devices; addressable smoke detector/sounder bases and smoke/heat detectors located in individual sleeping rooms, corridors, common areas and mechanical/electrical spaces.

Fire Alarm Testing and Inspection: A certified fire alarm company tests individual components of the fire alarm system annually.

Automatic Sprinkler System Description

Type of System: Automatic sprinkler tied into fire alarm system.
Coverage: Building fully sprinklered.
System Inspection: Automatic sprinkler system inspected annually by a certified inspection company.

Fire Suppression Equipment

Portable Fire Extinguishers: Fire extinguishers located in accordance with NFPA 10, Standard for portable Fire Extinguishers.
Portable Fire Extinguisher Inspections: Belmont University maintenance staff inspects fire extinguishers located in residence halls monthly. Certified vendor in accordance with NFPA 10, Standard for Portable Fire Extinguishers, conducts annual inspection.

Fire and Evacuation Drills

Drills: Residence Halls have fire drills twice per year. All fire drills are unannounced and random. All fire drills are evaluated for their effectiveness by Residence Life staff and the Office of Risk Management and Compliance.
WRIGHT HALL

Building Name: Wright Hall
Address: 1900 Belmont Blvd.
Year Built: 1966
Occupancy: Residence Hall
Capacity: 198
Construction Type: Reinforced concrete slab, CMU walls, flat roof concrete slab.

Fire Alarm And System Description

Fire Alarm Panel: SimplexGrinnell

General Description: Fire alarm system consists of manual pull stations, visual/audible alarm devices and integrated automatic detection devices; addressable smoke detector/sounder bases and smoke/heat detectors located in individual sleeping rooms, corridors, common areas and mechanical/electrical spaces.

Fire Alarm Testing and Inspection: A certified fire alarm company tests individual components of the fire alarm system annually.

Automatic Sprinkler System Description

Type of System: None
Coverage: None
System Inspection: N/A

Fire Suppression Equipment

Portable Fire Extinguishers: Fire extinguishers located in accordance with NFPA 10, Standard for portable Fire Extinguishers.
Portable Fire Extinguisher Inspections: Belmont University maintenance staff inspects fire extinguishers located in residence halls monthly. Certified vendor in accordance with NFPA 10, Standard for Portable Fire Extinguishers, conducts annual inspection.

Fire and Evacuation Drills

Drills: Residence Halls have fire drills twice per year. All fire drills are unannounced and random. All fire drills are evaluated for their effectiveness by Residence Life staff and the Office of Risk Management and Compliance.
Kennedy Hall

Building Name: Kennedy Hall
Address: 1900 Belmont Blvd.
Year Built: 2003
Occupancy: Residence Hall
Capacity: 200
Construction Type: Pre-stressed concrete slab, steel stud walls and roof joists.

Fire Alarm And System Description

Fire Alarm Panel: SimplexGrinnell

**General Description:** Fire alarm system consists of manual pull stations, visual/audible alarm devices and integrated automatic detection devices; addressable smoke detector/sounder bases and smoke/heat detectors located in individual sleeping rooms, corridors, common areas and mechanical/electrical spaces.

**Fire Alarm Testing and Inspection:** A certified fire alarm company tests individual components of the fire alarm system annually.

Automatic Sprinkler System Description

Type of System: Automatic sprinkler tied into fire alarm system.
Coverage: Building fully sprinklered.
System Inspection: Automatic sprinkler system inspected annually by a certified inspection company.

Fire Suppression Equipment

**Portable Fire Extinguishers:** Fire extinguishers located in accordance with NFPA 10, Standard for portable Fire Extinguishers.

**Portable Fire Extinguisher Inspections:** Belmont University maintenance staff inspects fire extinguishers located in residence halls monthly. Certified vendor in accordance with NFPA 10, Standard for Portable Fire Extinguishers, conducts annual inspection.

Fire and Evacuation Drills

**Drills:** Residence Halls have fire drills twice per year. All fire drills are unannounced and random. All fire drills are evaluated for their effectiveness by Residence Life staff and the Office of Risk Management and Compliance.
THRAILKILL HALL

Building Name: Thrailkill Hall
Address: 1900 Belmont Blvd.
Year Built: 2005
Occupancy: Residence Hall
Capacity: 324
Construction Type: Pre-stressed concrete slab, steel stud walls and roof joists.

Fire Alarm And System Description

Fire Alarm Panel: SimplexGrinnell

General Description: Fire alarm system consists of manual pull stations, visual/audible alarm devices and integrated automatic detection devices; addressable smoke detector/sounder bases and smoke/heat detectors located in individual sleeping rooms, corridors, common areas and mechanical/electrical spaces.

Fire Alarm Testing and Inspection: A certified fire alarm company tests individual components of the fire alarm system annually.

Automatic Sprinkler System Description

Type of System: Automatic sprinkler tied into fire alarm system.

Drills: Residence Halls have fire drills twice per year. All fire drills are unannounced and random. All fire drills are evaluated for their effectiveness by Residence Life staff and the Office of Risk Management and Compliance.
Belmont University
Annual Fire Safety Report 2019

PEMBROKE HALL

Building Name: Pembroke Hall
Address: 1900 Belmont Blvd.
Year Built: 1913
Occupancy: Residence Hall
Capacity: 127
Construction Type: Reinforced concrete slab, wood 2 x 4 walls, flat roof concrete slab.

Fire Alarm And System Description

Fire Alarm Panel: Notifier

General Description: Fire alarm system consists of manual pull stations, visual/audible alarm devices and integrated automatic detection devices; addressable smoke detector/sounder bases and smoke/heat detectors located in individual sleeping rooms, corridors, common areas and mechanical/electrical spaces. Fire Alarm Testing and Inspection: A certified fire alarm company tests individual components of the fire alarm system annually.

Automatic Sprinkler System Description

Type of System: Automatic sprinkler tied into fire alarm system.
Coverage: Building fully sprinklered.
System Inspection: Automatic sprinkler system inspected annually by a certified inspection company.

Fire Suppression Equipment
