

**Study Abroad at Bond University
in Queensland Australia**

Belmont University has many opportunities for study abroad experiences. Because we are the host university for the Cooperative Center for Study Abroad, the opportunities to study in a foreign country are virtually endless. As a psychology major, we encourage you to take advantage of these experiences to broaden your perspective and see how other cultures think about some of the perennial questions that psychologists study. Keep in mind too that you can earn course credit in any number of academic disciplines from humanities and foreign languages to fine arts, philosophy, junior cornerstone courses, and of course psychology.

If you wish to earn psychology course credit, consider a study abroad experience in Australia for a semester. Bond University is a private university located in the Gold Coast area of Queensland, Australia. Students who have studied there in the past report a wonderful experience. Psychology major Melissa Lachiver spent a fall semester there and reports that, *“My time spent at Bond University was incredible and without a doubt, life changing. Not only was I studying at one of the most beautiful locations in the world, I was also given the opportunity to learn both in and out of the classroom from international students and professors, travel extensively throughout Australia and New Zealand, and work towards my Belmont Psychology degree all at the same time. Given the excellent Psychology courses at Bond, and the ease of my transfer back to Belmont, I would highly recommend the Bond University experience to Belmont Psychology students in particular.”*

To apply for a study abroad experience at Bond, contact either the Psychology Department chair, Dr. Pete Giordano at 460-6256 or the Director of the Cooperative Center for Study Abroad. Her name is Dr. Maggie Monteverde and you can reach her at 460-6197.
